Ignite
the
Revolution!

The Story

The theme color of the Revogi brand is bright orange, which stands for happiness, creativity, determination and energy. Revogi is a young, dynamic and forward thinking company and so is its brand.

Our goal is to promote Smart Home solutions and take part in the market transition where Smart Home devices will be affordable and approachable for everyone. We aim to take the Smart Home from a niche market to the mass consumers and become a world class brand.

Connect, control, conserve!

Revogi products enable the user to create a safe and responsive environment in their house. That's not all!

Revogi products encourage eco-awareness and environmentally friendly attitude by providing the solutions to being aware and in control of the power consumption in their houses and thereby letting users save on their electricity bills! Locate and eliminate power vampires and standby power.

Orange is the new Green!

“Ok Google,
turn on my
lamp”

“Alexa,
turn on my TV”

Turn your Smart Power on and off
with the sound of your voice!

Smart Home gets smarter with voices

Smart voice-controlled speakers are hot right now with the launch of the Amazon Echo and Google Home.

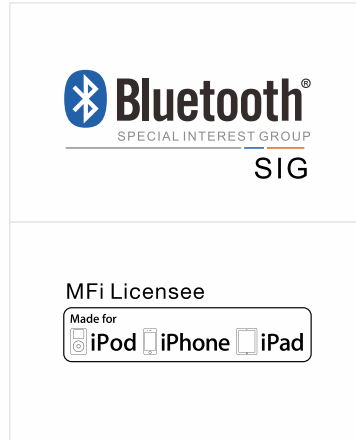

The Revogi Wi-Fi connected devices' integration with Echo Skills and Google Action allows a simple on/off switch in more natural way by voice.

Unlike competing devices that use complicated wireless protocols, Revogi smart devices work over Wi-Fi, making it easy to connect to Amazon Alexa or Google Assistant without the need for a hub.

We are getting our smart lighting HomeKit and Google Home enabled, so consumers can organize our smart lighting gadgets by room, manage multiple at the same time, control them with Siri, Google Assistant, and more.

We are still continuing our efforts for more and more protocols to achieve more interoperability!

CERTIFICATES

Revogi
