Device Installation

Step 1: Download APP

Scan with your smartphone or search the app store for **RevogiHome.**

**Step 2:** Plug into the power outlet

The power of Smart Plug will be on and wait till the Wi-Fi LED flashes quickly.

**Step 3:** Operate the APP

Enjoy!

Sign up/ Log in

1. Tap Log in if you already have a Revogi account or any 3rd party account: e.g. Facebook, Twitter etc.

2. Tap sign up and create an account. Enter your valid e-mail address when signing up for a new account.

3. If you forgot your password, reset it with the e-mail that you had used while registering an account.
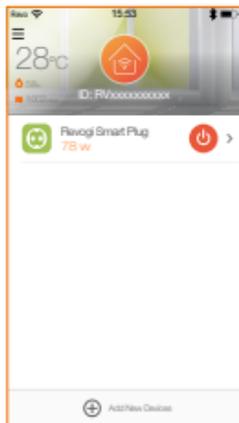

Reset your password

Forgot the password to your account? Reset it in these few simple steps:

1. Input the e-mail address that you have used when signing up.

2. Send verification code to your e-mail.

3. Input the verification code.

4. Set the new password.

Functionality

Homepage Management

≡ Tap to enter App Settings:
- Language settings
- Help and Feedback
- Price settings
- About

Tap to enter Account Settings:
- Change your profile Picture
- Change the name
- Check your account information
- Reset the password
- Log out

Control the plug and check the information about your device.
Long press your Smart Plug to enter the device settings.

Tap to add new devices (Currently RevogiHome only supports
Revogi Power Strips and Power Plugs).

⊕ Add New Devices

1. Make sure your smart phone has linked to the Wi-Fi network.

2. Tap Add New Device on Homepage, choose Scan the bar code on the back of device or Add new device manually. Tap on the flashlight icon on the upper right corner if the environment is not bright enough or the scanning has not been successful.

3. Enter the password of your router.

● Control your device via web

http://server.revogi.com/

1. Search the web and login with your account and the password registered previously in the app.

2. Now you can control your device directly from the browser.

Factory default reset

Reset the device by pressing the physical button on your Smart Plug until the Wi-Fi light indicator turns off.
You can also reset your device by deleting the device from your device list in the home menu or in the device settings (long press the device listed on the home menu, enter Setting and reset to Factory Settings).
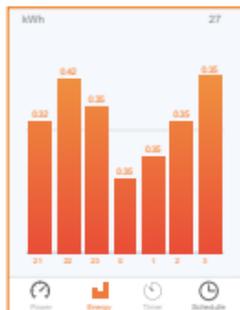

Real-time Power Consumption

Tap to return to homepage

Tap to enter setting:
Edit the product name/ Check the firmware version / Check the product information/ Switch on the reboot function

Socket Reboot: When network disconnection is detected, the socket that the router is plugged into will restart your router automatically.

Real-time watts reading, up to display 2400W.

History Power Consumption

1. Monitor history power consumption displayed by kWh or the price.

2. Monitor history power consumption displayed by Hours, Days, Month.
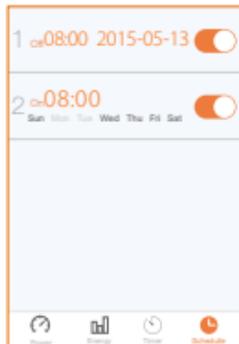

3. Tap "newest" to check current power usage.

4. Check the past statistics even when the device is offline.

⏱ Timer

1. Slide to set the timer.

2. Set the timer by "quick buttons" in 30s/ 1min/ 5min/ 30min.

3. Cancel the timer after it started when you change your mind.

📅 Schedule Setting

1. Set up to 12 schedules for one Smart Power Plug.

2. Schedules are stored in the device, even if the device is disconnected from the internet or is not controlled by the smart phone. The schedule will still be activated.
